

Welcome!

We are excited about your interest in participating in the Illuminated Visions 2.0 projection event! It is our pleasure to be able to provide artists with the opportunity to experiment with their work being projected on large scale buildings. This open call for entries is for all digital creatives who want to see their content illuminated on one of the sculptures of their choosing: The Wedge and/or the Tower, located in Cypress College.

We understand that the cost and complexity of projection mapping on large buildings can be a challenge for individuals, which is why we are thrilled to invite you to flex your creativity and show off your art projects. We will provide large venue Panasonic Projectors and handle the mapping process.

We are inviting students from Cypress College, local community members, and students from surrounding high schools. We are looking forward to creating a youthful and family friendly atmosphere!

See below for rules and technical requirements.
